L.H. Dottie Authorized Distributors

Introducing Dottie's Newest ARMORED GROUND CLAMP - 26MVP

LH Dottie has obtained the exclusive rights to a new, patent pending, UL Listed Armored Ground Clamp that answers installation requirements for armored cable and will save your contractors time and money.

Our **26MVP** is a BX ground clamp with two clamp points for the armor cover and a slot for the ground wire. This configuration eliminates the need to strip the cover completely off the ground wire when multiple ground attachments are required – just cut the cover, expose 1/2" of ground wire and slip the wire and cover into Dottie's new clamp – nothing could be easier. At \$25 an hour, or more, your contractor will save a significant amount of money with this clamp.

UL Listed in the US and Canada this clamp is rated for #8 solid to #4 stranded wire. This one clamp will replace two of Dottie's # **26** at each intermediate attachment point saving hours of stripping and rethreading of the armor cover.

Contact your LH Dottie salesman or order online at lhdottie.com.
